Hello Vanessa,

If there is no way of controlling the suitability of the space for clinical use (i.e. by way of condition) in your view then there is nothing further that I can add that would be of material relevance at this stage, the fit out of the space can hopefully be tailored to the specifications required by providers through discussion with Serco.

In respect of the space provided the 19.7sqm would be suitable for the purposes of providing a consultation/examination room. The critical element will be ensuring that the space is made fit for purpose to ensure that it functions as intended.

Kind Regards

Phil
